Liked mine so much, bought my wife one.

- EcoDrive
- perpetual calendar good to 2100
- 200m Water resist
- One-Piece Duratect Ti case
- Solid Duratect Ti band
- Screw down crown
- Sapphire crystal glass
- diameter:30mm
- thickness:10mm
- Movement: E766

It was the biggest watch my wife had worn, and took her a while to adjust to the tiny Skagens and "macy's brand" watches she'd worn before.

The scratch resistance of the bracelet is amazing considering she wears it loosely and daily.

The face's texture is very fine, and the size keeps the 3/6/9/12's to markers instead of arabic numerals.
